Association Internationale pour le Développement de l'Apnée
Section Allemagne
Deutscher Fachverband für Apnoe-Sport

Andreas Falkenroth
President

Please note:

Dear athlete,

We are happy that you want to announce a national record and we would like to wish you good luck for the preparation.

For the approval of national records which are accomplished apart from international competitions your AIDA national is responsible. To approve your record we need information about the dive and they need to be verified by at least one AIDA judge. We therefore recommend to read this form carefully prior the attempt to be aware about the information the judges need to record. Furthermore we recommend to send this document to your judges and to the doctor in advanced.

Please notice, for a successful approval we need:

- A successful registration of the record attempt at least two weeks in advanced.
- A completely filled out record report, signed by the judges, the doctor and the athlete.
- For depth disciplines: A picture of the logged dive from the official gauge.

Record Report of a National Record Attempt

(to be filled out by the athlete)

Name:

Date of birth:

Nationality:

Address:

Discipline:

Date of the attempt:

Location of the attempt:

Organizer:

Contact details of the organizer:

AIDA Judge representatives:

AIDA Judge:	Level:	Nationality:
-------------	--------	--------------

AIDA Judge:	Level:	Nationality:
-------------	--------	--------------

I hereby confirm that I am not related to the AIDA judges and the AIDA Judges are not affiliated with my sponsors. Furthermore they are not part of my coaching during my training as well as part of the organizer team.

Location, Date

Signature, Athlete

(To be filled out by the judges)

Official Top (OT): _____

Realized Performance (RP): _____

Hereby I ensure following:

- The athlete entered the location of the competition at least 60 minutes before the official top time and did not warm-up in the official warm-up zone prior the allowed 45min before official top. It was ensured that the athlete did not breath any kind of oxygen before the dive.
- The official line of the organizer was measured under tension and the marks were verified according to paragraph 3.1.1 / 3.1.2 AIDA International Competition Rules Technical Documentation*.
- A surface camera recorded the athlete at least two minutes before official top and one minute after surfacing.
- The protocol was done according to the AIDA International Competition Rules.

For depth disciplines:

- The official gauge was verified by the AIDA judges. (Please attach a picture of the dive log of the official gauge).*
- The official tags were attached on the bottom plate at a depth of _____m.

I hereby ensure that I am not related to the athlete and not affiliated with the sponsors, the organizers or the coach of the athlete. Furthermore I am a member of a AIDA national.

Location, Date	Signature Judge	AIDA National

* Please notice for depth disciplines in fresh water: The official gauge needs to be turned into fresh water mode. If you are using a Suunto (e.g. D4i) for the official gauge, please be aware that the dive computer has no fresh water mode and will just show you 97% of the real depth. Therefore a depth to 50m will show you 48.5m in the lake, for example.

(To be filled out by the doctor)

Name:

Address:

Qualification:

Please Note: The medical responsible needs to be a physician or emergency medical personal, specialized in resuscitation. We recommend the physician to have a conversation with the athlete prior the attempt about his medical condition. Particularly, we recommend to check for pulmonary edema (lung barotrauma), e.g. by checking the oxygen saturation.

I hereby ensure that I was present during the attempt and that the diver was in a good medical condition prior the dive.
